MIGHTY MO® 20
HEAVY DUTY SECURITY DOOR

The Mighty Mo 20 Heavy Duty Security Door offers a lockable, dual hinged door, designed to secure open racks in Data Rooms and colocation facilities. The Mighty Mo 20 open frame rack easily adapts with upper and lower door supports to provide for a conversion of a single rack or an entire row of racks. The doors assist in making the Mighty Mo 20 even more data center ready by enclosing the electronics as well as protecting and securing data connections.

BENEFITS

- Limits access to equipment in open racks
- Creates secure vertical manager interface when the door is locked
- Field retrofit to any existing Mighty Mo 20 frame
- Front and rear door options for complete security
- Creates a clean look by concealing electronics and cabling

designed to be better.™
