# Campus fiber solutions

---

More than IT, your campus fiber network supports the wireless communications, connected devices, applications and systems that drive productivity within and among buildings. As its role increases, so do the demands placed upon it. 1 Gbps in-building cabling, once considered sufficient, must evolve toward 40 Gbps, 100 Gbps and beyond.

At CommScope, we see the untapped potential in your campus network. Advances in fiber cabling and connectivity now support faster speeds, over longer distances and with greater reliability. We help you put it to work.

Our campus network portfolio includes singlemode and multimode cabling, connectors, panels, enclosures, splice equipment and more. All components are certified to meet or exceed industry standards. A unique WebTrak® serial number lets you trace and verify the performance of each individual cable, fiber assemblies, modules and more.

This easy-to-use ordering guide features our most commonly used campus fiber elements. For more information, visit our [online catalog](#) or [contact your CommScope representative](#).

Your campus network is capable of more and getting you there is our priority.

Partner with CommScope and let's shape the future of your campus network together.

# Campus Fiber Solutions

Field installable connectors by CommScope offer flexible network solutions that are ideal for campus environments where exact measurements are not possible, or when there's a need for a fast repair to restore network connections. The factory pre-polished ferrule eliminates the need for polishing, adhesives, and crimping in the field—minimizing the potential for operator error and expensive connector scrap. Easy to use and quick to install, CommScope field installable connectors and tool kits are designed to simplify the termination process and enable you to terminate and move to your next project with minimal investment in time and cost.

- Fast to install
- No requirement for pre-engineered lengths
- Eliminates unwanted slack storage
- Consistent and reliable terminations
- No epoxy, no polish, no crimp
- Reduces scrap and waste
- Compatible with industry-leading splicers

CommScope offers an extended line of field installable connectors and tool kits, including mechanical splice Qwik II and fusion splice-on Qwik-Fuse connectors. At CommScope, we know campus network solutions are not a one size fits all. You can trust in our products and team of experts to help add the flexibility you need to create a quality solution.

# Distribution Cables

Distribution cables are color coded 900um tight buffered fibers for easy connectorization. Fiber counts above 24 are unitized for manageability. All fiber types are bend insensitive. Single mode fiber is ITU-T G.657.A1 compliant, as well as backwards compatible to G.652.D.
